

2017 Cadet Challenge Group Post Project

Post group projects will be presented on the final day of the challenge (*June 10th*). The project will be *based on your posts' local community*.

Please select an area of interest or concern that has been an ongoing or currently becoming an issue for your community (i.e. methamphetamine use by pregnant mothers, homeless population, local burglaries in a specific neighborhood or area of the community, teen drinking, vehicle accidents at a specific intersection, etc.). The post will treat their topic of concern as a Problem Based Learning Exercise. Each post will need to develop an action plan on how they (as a cadet post) can assist in alleviating the issue, problem or concern, in hopes to cause the cadets to learn about their community and offer insight on how to address specific, local concerns.

Each post will then present their respective projects. The presentation should include a synopsis of the local issue or concern, why your post decided on said issue, the target audience and their plan to aid in elevating the issue, problem or concern (i.e. community action, developing a community program, community education, etc.)

Please submit any questions or concerns to Officer Kaitlin Cummings
